

## **OUTSIDE Cameras RECOMMENDATIONS**

**There are so many styles, designs and prices of or outside cameras it would be impossible to designate one style or even a couple in different price ranges. Therefore we have decided on things that people could NOT do to keep it within a reasonable request.**

- 1. Cameras cannot be aimed at neighbors homes.**
- 2. No tracking motion - they get stuck and don't always reset.**
- 3. No flood lights**
- 4. No cords can show on outside of building - need to be behind siding.**
- 5. No colors other than BLACK or BROWN**
- 6. Doorbell rings are OK**
- 7. Cameras in your own courtyards are OK as long as they are Only aimed at your private area.**
- 8. Only mounted on your individual unit/garage. Specifically on your side of wall or fence. Not on fence between homes.**
- 9. Not allowed on decks**

**An ACC request for outside cameras must be submitted to the ACC Committee for approval and proper placement on home/garage, prior to any installation. ONLY Doorbell ring cameras are allowed without approval.**

**Approved by the Board of Directors on 1/23/2024**
